**ABEM**

RAMAG2 and Windows 7

By Robert Lundkvist

NOTE: The following instruction has only been tested with the 32-bit version of Windows 7.

- Open the RAMAG2 catalog in Explorer, usually C:\RAMAG2.

- Right-Click on RAMAG2.EXE and choose Properties in the menu.

- Choose the Compatibility Tab

- Check the Box for "Run this program in compatibility mode for:"

- Choose "Windows XP (Service Pack 3)" in the drop down menu.

- Do the same as above for WadiDL.EXE.

- You will also have to install the latest Sentinel Protection Installer from:
  https://sentinel.gemalto.com/support-downloads/sentinel-drivers/
